

**WE ARE
CAVIS.**

THE WORLD NEEDS WHAT WE KNOW.

CAVIS isn't just a service provider—it's your competitive edge.

We deliver industry-leading electrical maintenance, major construction, automation, automation engineering, communications, panel fabrication, combustion and emissions reduction, measurement and renewable/solar services.

Our CAVIS team produces high-impact, high-quality solutions. From complex system integration to on-site embedded technicians, our growing team brings agility, precision, and a customer-first mindset to every project. We simplify the process, elevate the outcome, and earn your trust—and we do more than follow industry standards—we define them. Choosing CAVIS Energy means partnering with an end-to-end service provider that combines extensive experience, a comprehensive service lineup, and a customer-focused approach to deliver exceptional results.

When you work with us, you're building a lasting, trusted partnership that propels your business forward. We are built from a legacy of quality work, intuitive solutions, and skilled people united in the pursuit of excellence and the connection of strong values.

We are the solution provider for the upstream, midstream, and renewable energy segments, and we support industrial utilities and infrastructure, materials manufacturing, industrial construction and engineering, water/wastewater industries and municipalities.

POWERING WHAT WE STAND FOR

C · A · UIS

For **Capital**. The **first**. The **standout**. And a tribute to CDN Controls- our Canadian counterpart.

For **Axiom**. The **established**. The **self-evident** choice.

Latin for **power, force & strength**.

PURPOSE-DRIVEN FUTURE-FOCUSED

OUR MISSION STATEMENT

Empower people.
Forging partnerships.
Driving market dominance with integrity.

OUR VISION STATEMENT

Creating a legacy of ambition, performance
and global impact.

OUR CORE VALUES

Core values are the muscles we exercise. It's what's at the heart of our company and the foundation of who we are.

Together, they tell our story:

We are a market dominator, and our performance is driven by our people, who are supported by the tools they need to thrive. Great people, equipped with the right resources, deliver our limitless potential.

**TRUST, HONESTY,
RESPECT — ALWAYS.**

**WORK AS ONE.
WIN AS ONE.**

**BE TENACIOUS, BE
RESILIENT, OUTPERFORM.**

**INVEST IN OUR PEOPLE,
OUR CLIENTS, OUR
BUSINESS, OUR FUTURE.**

INDUSTRY-LEADING SOLUTIONS

SAFETY-FIRST APPROACH

We have a clear safety standard for all employees, contractors and suppliers. Our employees are empowered with stop-work authority, and every employee is responsible for their own safety and the safety of their teams. This includes:

- Zero-tolerance towards hazards, incidents, and injuries
- Products are safe and without adverse environmental impact
- Compliance with legal requirements and industry standards
- Proactive assessments in health, safety and environmental hazards for new business, new and existing work systems, practices and equipment
- Problem solving at all levels of the organization to implement work practices that continually improve safety, environmental standards and productivity
- Reporting and investigating incidents and implementing systems and practices that prevent reoccurrence
- Ongoing training and development to improve and reinforce behavior-based safety

SAFETY COMPLIANCE MEMBERSHIPS

ELECTRICAL MAINTENANCE SERVICES

A TRUSTED PARTNER FOR ALL YOUR INDUSTRIAL MAINTENANCE NEEDS

With extensive experience installing, maintaining, repairing and constructing electrical systems for the region's most demanding industries, we have the expertise to handle any electrical project—no matter the size or complexity.

WE OFFER:

- Industrial maintenance
- I&E maintenance plan development & execution
- Energy and industrial facility shutdown & turnaround support
- Commissioning & startup support
- System & equipment inspections
- Calibrations
- Device (Instrument, Electrical, Pneumatic)
- Fire & gas
- Electronic flow measurement
- Shutdowns
- Power line
- Repair shop, sales, & service
- Pumps, valves, actuators, meter runs & PSV servicing
- Device & equipment rentals
- Document control
- Procurement

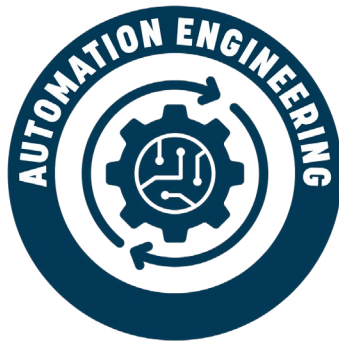

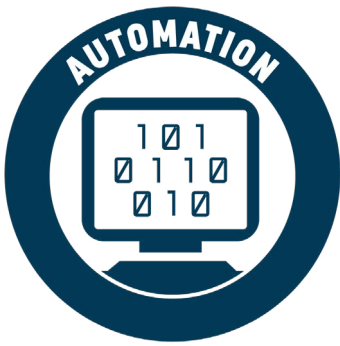

MAJOR CONSTRUCTION

STREAMLINED MAJOR CONSTRUCTION SOLUTIONS

We manage construction builds of all scales across multiple industries. From detailed planning to hands-on management, we deliver projects that stay on schedule, on budget and aligned with client goals.

WE OFFER:

- Full-spectrum instrumentation, electrical, automation & controls
- Greenfield facility & wellsite construction
- Brown field facility & wellsite expansion
- Modular process buildings pre-wire
- Modular pipe rack modules pre-wire
- Modular e-house fabrication & pre-wire (including skid & building)
- Power generation packages
- Low & medium voltage power distribution equipment installations
- Commissioning & start-up
- Decommissioning
- Quality control

AUTOMATION SERVICES

EXPERTISE BEHIND EVERY SOLUTION

We deliver end-to-end automation solutions with a focus on efficiency, security, and long-term support. Our services cover design, engineering, project management, construction, commissioning, and maintenance. From concept to operator training, we provide full-cycle SCADA, PLC, HMI, and communication capabilities. Our team supports everything from single well batteries to enterprise-wide SCADA strategies—backed by 24/7 expert maintenance across leading industry platforms.

AUTOMATION:

- Instrument procurement & supply
- Hardware & software procurement, migration, and upgrade
- Facility I&E design, construction, and project management
- EFM installation, service, and calibration
- System design, programming, fabrication, installation, testing, integration and commissioning — includes PLCs, RTUs, HMIs, and SCADA, as well as other communication systems
- Preventative maintenance, repair, troubleshooting, and scheduling
- Turnarounds
- Embedded technicians

AUTOMATION ENGINEERING:

- Control narratives, safe charts, PFD's and P&ID's
- SCADA, PLC, and HMI system development and design
- Project management
- Hardware & software procurement
- Complete documentation
- Panel design, fabrication, and testing
- Customization of data reporting to suit customer needs
- System programming — PLCs, RTUs, communications, node polling
- System installation, testing and commissioning
- Custom operations/instruction manuals user training
- Customization of field controls to suit customer needs.

COMMUNICATIONS & FIBER OPTICS

COMMUNICATION INFRASTRUCTURE YOU CAN DEPEND ON

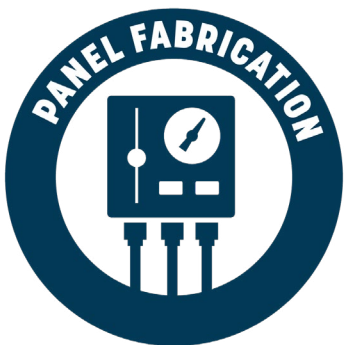

We specialize in enhancing remote industrial communications through advanced technology, focusing on land-based radio and cell phone networks. Our services include customized solutions and comprehensive tower services, ensuring the stability and confidence in your communication infrastructure.

WE OFFER:

- Communication systems design
- Optimization through RD analysis/topographic data
- Mobile network design deployment
- CSA & non-engineered tower support/deployment
- Wired & wireless networks
- Two-way radio system design
- Cost/benefit analysis
- Objective audit & system assessment
- Licensing & compliance audit

FIBER OPTICS

- Structured cabling & category cabling
- Fully certified for fiber optic design, installation, and testing
- Large-capacity fusion splicing
- Network analysis and auditing

FABRICATION

YOUR ONE-STOP PANEL SHOP

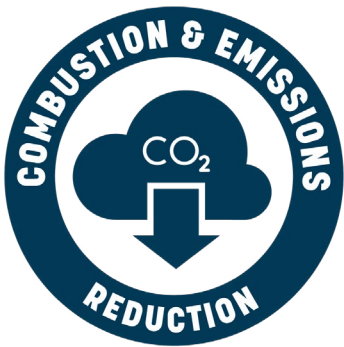

We specialize in all aspects of analog and digital control panels, including design, fabrication, installation, training, maintenance and support. Recognizing that every project is unique, our in-house fabrication team can design and program panels to precise specifications.

WE OFFER:

- Control panel fabrication licensing & compliance audit
- PLC, DCS, SCADA, HMI VFD communications, distribution panels, junction boxes, operator control stations, photovoltaic (PV) panels, combiner boxes & compressor control panels
- Deliver low-volume custom/high-volume repeatable solutions
- System acceptance testing
- UL certified
- Commissioning support

COMBUSTION & EMISSIONS REDUCTION

MAXIMIZED EFFICIENCY, MINIMIZED EMISSIONS

We provide end-to-end solutions that keep your operations running smoothly, reduce downtime, cut costs and lower emissions.

WE OFFER:

- Preventative maintenance
- Annual emergency shut-down testing
- Biennial flame arrester testing
- Ongoing support & repairs
- Custom burner & emissions tuning
- Burner panel support
- Methane reduction

MEASUREMENT

PRECISION YOU CAN RELY ON

We provide end-to-end solutions in measurement, accounting, technical metering, troubleshooting and installation.

WE OFFER:

- Meter inspections & verification
- Metering discrepancies & auditing
- Technical measurement support & meter installations
- Receipt point inspections
- Regulatory compliance
- Automated data collection
- Liquid meter proving (inline/ bench/field)
- Meter exemptions & OPEX saving
- Product sampling & analysis
- Measurement schematics

RENEWABLES & SOLAR

THE FUTURE IS BRIGHT FOR SOLAR SOLUTIONS

CAVIS is actively growing its market presence to support the clean energy transition through our automation, electrical maintenance and instrumentation services. Our work includes constructing EV charging stations and automating solar panel production processes—helping drive innovation and efficiency across the renewable energy landscape.

WE OFFER:

- Wholesale PV wire supply (RPVU)
- Solar wiring harness fabrication shop services
- Electrical field construction
- SCADA & communications
- Solar operations & maintenance (O&M) support
